

## Payson PCE WQARF Site-Kachina Trailer Park Notice

The Arizona Department of Environmental Quality (ADEQ) has recently conducted sampling of the private well that provides drinking water to the residents of Kachina Trailer Park, 1001 S. Goodfellow, and 309-311 W. Aero Drive in Payson, Arizona. This sampling was conducted as part of the Payson Water Quality Assurance Revolving Fund (WQARF) site. Results of that sampling indicate that PCE (tetrachloroethene) is present in the Kachina Trailer Park well at a concentration of 15 parts per billion (ppb) which is above the federal drinking water standard of 5 ppb.

The Arizona Department of Health Services (ADHS) has evaluated the risks to the trailer park residents from the PCE contamination and has concluded that the water is safe to drink and to use for other residential uses (Please see attached Information Sheet from ADHS). However, due to the fact that the water is above the federal drinking water standard of 5 ppb, ADHS recommends that residents drink bottled water instead of the well water.

As a result, ADEQ is providing bottled water to the residents of the Kachina Trailer Park for drinking water and will continue to provide it until the concentrations of PCE are consistently below the federal drinking water standards. If you are a Kachina Trailer Park Resident, please contact Pam at lot #7 in the Kachina Trailer Park to receive your supply of bottled drinking water free of charge. ADEQ will continue to monitor the well to evaluate your water and keep you informed.

### ADDITIONAL INFORMATION

If you have any questions regarding health concerns associated with PCE, please call the Arizona Department of Health Services (ADHS) office at (602) 364-3118.

If you have questions or concerns regarding the Payson WQARF site or the sampling results, please contact:
